

Pranjal Yadav

Kanpur, Uttar Pradesh | 2k24.cs11.2410719@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

Education

Pranveer Singh Institute of Technology (PSIT), Kanpur, UP

Bachelor of Technology in Computer Science & Engineering

Expected May 2028

CGPA: 6.9/10 (through Sem IV)

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, Python
- **Frontend:** React 19, Next.js 16, Tailwind CSS, HTML5/CSS3
- **Backend & System Design:** Node.js, Express.js, RESTful API Design, Microservice-style Modular Architecture, Sandboxing & Isolation Patterns
- **Data & Auth:** PostgreSQL, Prisma ORM, Supabase, JWT-based Auth
- **Tools & Cloud:** Git, GitHub, VS Code, Netlify, Vercel, Postman, CI-style Build Pipelines

Full-Stack & Web Projects

dev-mcp — AI Engineering Operating System (MCP Server)

[GitHub](#)

- Architected a Python-based Model Context Protocol (MCP) server exposing 70+ tools across 11 modules (session orchestration, task backlog, PRD validation, Git ops, sandboxed file I/O) to give AI coding agents persistent, stateful project context.
- Designed a multi-tenant **sibling-workspace isolation architecture** — each project gets a self-contained "Project Brain" (`.project.brain/`) with independent context, backlog, and history to prevent cross-workspace state leakage.
- Implemented a 3-tier safety/permission system (*safe, trusted, lab*) with path-jailing (`Path.relative_to`), a regex-based destructive-command blocklist, and workspace-locked file operations to sandbox untrusted AI-driven code execution.
- *Stack:* Python, FastMCP, CLI tooling, JSON-based state management, Git automation

GitVibe — Developer Personality Analytics Platform

[Live Demo](#) | [GitHub](#)

- Built a Next.js 16 app that transforms GitHub commit history and activity into data-driven developer personas using a deterministic Mulberry32 PRNG and Shannon-entropy-based statistical engine, requiring no backend database.
- Designed a hybrid ISR/SPA architecture with a multi-leg parallel data aggregator, in-flight request coalescing, and sliding-window API rate limiting; built high-DPI PNG identity-card export and dynamic OpenGraph image generation.
- *Stack:* Next.js 16, React 19, TypeScript, Tailwind CSS v4, GitHub REST API

Braynix Studios — Agency Portfolio Platform

[Live Demo](#) | [GitHub](#)

- Built a responsive studio landing page with scroll animations (Intersection Observer API) and Formspree-based lead generation.
- *Stack:* HTML5, CSS3, JavaScript (ES6), Intersection Observer, Formspree

Achievements & Hackathons

- **FedEx SMART Hackathon** — Shaastra 2026, IIT Madras (Feb 2026): full-stack solutions for logistics challenges. [Certificate](#)
- **Appian AI Application Challenge** — Shaastra 2026, IIT Madras (Jan 2026): prototyped enterprise workflow apps. [Certificate](#)
- **ISRO Bharatiya Antariksh Hackathon 2026** — presented by ISRO, powered by Hack2Skill (Aug 2026): submitted an innovative idea for real-world space-tech challenges. [Certificate](#)

Coding Profiles & Open Source

- **LeetCode:** 200+ DSA problems solved — [Profile](#)
- **GitHub:** 1600+ contributions — [Profile](#); contributor to 4+ open-source projects, including Google's `genkit-ai` (Google)
