

AI TEACHER

Full-Stack Adaptive Educational Platform

Built for the Bharat Academix AI Innovation Hackathon 2026

The Limitations of Conventional E-Learning

The current model is fundamentally broken because it treats every student exactly the same.

Recreating the Human Teaching Cycle

From Raw Material to Personalized Mastery

Multi-Layered AI Intelligence

Hybrid Neural Video Synthesis

```
def pythoc():  
    sappy = samespace(cas)  
  
    for sets in axes, target):  
        print("She receiver - " sonpetilis)  
        return sopt)  
  
class Pythnad(-C++) {  
    int main();  
  
    etic c:casar(oyepitoxl) & * regmart.silonoif();  
    return 0;
```

Biology

History

The Video Teaches Back

Incorrect answers trigger targeted teaching, not just an 'X' mark.

Built for Scale, Speed, and Reliability

100% Coverage across Feature, Boundary, Cross-Feature, and Real-World Scenarios.

A New Era of Education

	Traditional E-Learning	AI Teacher
Content Model	One-Size-Fits-All	Dynamically Personalized to Learner
Media Format	Passive Video Playback	Interactive & Hybrid Grounded Video
Evaluation Method	Answer-Only Grading	Cognitive Misconception Diagnosis
Intelligence State	Amnesic System	Persistent Multi-Session Mastery Profile
Accessibility	Monolingual	Native Multilingual (Mid-Session Switching)

The Scalable Intelligent Companion

Future Scope

- Voice Interaction
- Richer Learner Modeling
- LMS Integration
- Cloud-Scale Deployment
